## **Completion Timeline**

Learning agreement applicable on every day on placement

If **ANY concerns** at **ANY time** throughout the placement, please refer to the university immediately and if applicable, your organisational policy for failing students.

## **Common Placement Assessment Form (CPAF)**

## **Assessment Guidance Overview**

Please ensure that you refer to the <u>CPAF Guidance Documents (student and practice team) and other resources on</u> <u>the CSP website</u> for detailed information to support your completion of this form.

The CPAF is made up of 4 key parts;

- Learning Agreement
- Professional Behaviours and Responsibilities
- Learning Domains
- Feedback from Others

Learners are assessed on the following parts at both the halfway and end of placement points:

- Professional Behaviours and Responsibilities and
- Learning Domains

#### They MUST both be passed independently by the final assessment.

Despite the **Learning Agreement** and **Feedback from Others** not being formally marked, they do play a vital role in the learner and practice team experience and information recorded here can evidence achievement of the learning domains. Please ensure these parts are completed and discussed between learner and practice educator(s) at regular intervals.

#### **Professional Behaviours and Responsibilities**

This part assesses the fundamental professional qualities, competence and behaviour of the learner whilst on placement. They must demonstrate professionalism with adherence to local guidelines, policies and procedures, as well as the HCPC Guidance on Conduct and Ethics for Students (2016) and the CSP Code of Members' Professional Values and Behaviour (2019).

- Marked as 'Pass/Fail' for ALL learners
- The learner MUST pass this section by the end of the placement
- Failure in 'Professional Behaviours and Responsibilities' will override 'Learning Domains' and cause the learner to fail the placement at any stage
- The options for demonstrating the professional behaviour/responsibility are 'yes or no' with space for comments. If a learner fails to achieve an area of professionalism by the end of the placement, they will be awarded a 'no' and will result in failure of the placement

#### I have concerns about a learner's performance, what should I do?

We encourage active use of this part throughout the placement, not waiting for the halfway or end of assessment point. If **AT ANY STAGE** there are concerns about a learner's professional performance, please contact the named university link tutor immediately. **Learners should be given a verbal warning regarding any unsafe practice and/or unprofessional behaviour at the time of the incident.** This must then be documented within both 'Professional Behaviours and Responsibilities' and the 'Records of Warning Given' section located in Appendix 1 and must be flagged with the learner's university link tutor at the earliest time possible.

An action plan must be clearly documented after any verbal and written warnings as well as during the halfway assessment in order to maximise the learner's ability to achieve an acceptable standard of practice. Please refer to the relevant university processes for further information regarding poor performance.

### Learning Domains

There are 10 learning domains;

| Personal                   | 1. Independent learning                              |
|----------------------------|--|
| Development                | 2. Seeking, reflecting on and responding to feedback |
|                            | 3. Organisation and prioritisation                   |
| Interpersonal Skills       | 4. Communication                                     |
|                            | 5. Working with others                               |
|                            | 6. Individuals, communities and populations          |
| <b>Decision Making and</b> | 7. Gathering and analysing information               |
| Implementation             | 8. Evidence-based practice                           |
|                            | 9. Reasoning and intervention                        |
|                            | 10. Recording information                            |

Each learning domain contains 3 associated learning outcomes against which their performance is assessed. The learning domains and their learning outcomes are consistent for ALL learners. Assessment criteria for each of these is shaped to the learners' level of study.

- This part is marked as either 'Pass/Fail' or 'Graded' dependent on university requirements (using the same assessment criteria)
- The learner MUST pass all 10 learning domains by the end of the placement
- The learning domain indicates learner achievement by the END of the placement (eg. during the final week)
- Summarised marking criteria is provided for each learning domain. Please refer to Appendix 2 for the full marking rubric to help support your assessment
- Learners and practice educators are required to assess achievement of the learning domains at both the halfway and end of placement assessment points. This includes;
  - 'Tick box' or written selection of the most appropriate assessment boundary for each learning domain (including self-evaluation for learners) dependent on whether using editable pdf or word version
  - Written feedback after each 'group' of leaning domains (personal development, interpersonal skills and decision making and implementation)

### What is required to pass a learning domain?

Using the assessment criteria, practice educator(s) are required to make a professional judgement about the learner's level of ability. Practice educators and learners should select the appropriate ability achievement at both the half way and final assessment points.

## As there is variation in what constitutes a pass mark between universities (eg. At some it is 40% and others it is 50%), please check with your local university to ensure that you are aware of their Pass/Fail threshold.

### When is written feedback provided?

After each group of learning domains (personal development, interpersonal skills, decision making and implementation), there is space for written feedback by both the practice educator(s) and learner. At the halfway point, please complete the 'action plan' to allow any steps to be put in place within the second half of the placement.

### What if a learner is awarded a 'fail' mark at the halfway assessment?

The learning domains indicate learner achievement by the end of the placement and they may not all be met by the halfway point (either via opportunity or performance). If this is the case however, practice educator(s) and learner should work together to ensure the action plan for the second half of placement clearly details the steps that will be put in place to support achievement. If you feel that a learner is at risk of failing this whole section by the end of placement point, this MUST be flagged with the university link tutor at the earliest possible opportunity.

### What if a learner is awarded a 'fail' mark at end of placement assessment?

- If a learner is awarded a 'fail' within one of the three learning outcomes within a learning domain, an overall pass mark for the learning domain is awarded
- If a learner is awarded a 'fail' within two or more learning outcomes within a learning domain, an overall pass mark for the learning outcome is <u>not</u> awarded and they will unable to achieve an overall pass mark
- A learner can fail up to three learning outcomes across different learning domains and still achieve an overall pass mark. If they fail four or more learning outcomes across the ten learning domains, they will be unable to achieve an overall pass mark

### What if a learner is assessed using Pass/Fail?

The same assessment criteria are used. Although these learners may not need a formal grade boundary for their assessment, they will receive the same detail of feedback as those who do. This allows learners' an equal understanding of where have performed well or where they can further develop and enable them to see how they performed against a graded structure.

### What if I feel the learning domain is not achievable in my placement setting?

The learning domains are applicable in a diverse range of placement settings; in person and remote as well as nonpatient facing areas of practice. For examples of how they may be demonstrated in different areas with different models of supervision, please refer to the CPAF Guidance Documents. Please seek guidance from the HEI if you deem any of the domains unachievable in your practice environment.

### Should practice educators provide a specific % or grade boundary for each learning domain?

Please seek university guidance regarding this.

### Is each learning outcome within a domain equally weighted?

Practice educators are encouraged to make a professional judgement here, using their knowledge of the setting and sector. If it is felt that one learning outcome should be weighted higher in their setting this is possible and should be considered in the overall assessment for that specific learning domain.

### How is a final award calculated for the learning domains?

For the end of placement assessment, the practice educator(s) will award the appropriate percentage/grade boundary for each learning domain. The final numerical mark should be an overall mark that represents the learner's performance on placement.

We would like to hear from you! How have you found CPAF? What setting have you used it in? Using what models of supervision? This short survey (taking no more than 5 minutes to complete) will help inform the ongoing development of CPAF and allow a better understanding about where it has been used. Please either follow <u>this</u> <u>survey link</u> or scan the below QR code to take you to the survey.

## **Glossary of Terms**

| Term                          | Description  |
|-------------------------------|--|
| Appropriately                 | Right or suitable for stage of learning, for example what would be a reasonable expectation of a 2 <sup>nd</sup> year student in this setting?   |
| Complex and<br>unpredictable  | Events which would not normally occur within day-to-day practice, or which would provide particular challenges to the learner  |
| Critically evaluate/<br>aware | Critical thinking is a process used to think about and evaluate information then<br>reach a conclusion. In this context the word critical is not negative. It means that<br>you should not automatically accept that what you are reading is valid, true,<br>applicable or correct. Instead, you should gather the evidence, acknowledge your<br>own values and beliefs, analyse all aspects and reach your own conclusion |
| Frequency                     | <b>Consistently:</b> used to describe a situation where the learner meets the requirements of the criteria >90% of the time. Should be measured over a defined period of performance preceding the half way/final assessment and not over the duration of placement  |
|                               | <b>Most:</b> used to describe a situation where the learner meets the requirements of the criteria >60% but <90% of the time   |
|                               | <b>Some:</b> used to describe a situation where the learner meets the requirements of the criteria >30% but <60% of the time   |
|                               | <b>Occasional/minimal:</b> used to describe a situation where the learner meets the requirements of the criteria <30% of the time  |
| Independent                   | Capable of acting for oneself or on one's own (proportionate with level of study)  |
| Leadership                    | Ability to lead, demonstrates leadership qualities e.g. focus on self, working with others or improving healthcare   |
| Prompting                     | Used to describe a situation where the practice educator provides input to the learner by the use of a key word, indirect or open questioning to facilitate learning   |
| Reflective Practice           | The process of reviewing an episode of practice to describe, analyse, evaluate<br>and inform professional learning. New learning modifies previous perceptions,<br>assumptions and understanding and the application of this learning to practice<br>influences interventions and outcomes   |
|                               | <b>Critical reflection:</b> This involves analysing all aspects of your episode of practice whilst challenging and detecting any assumptions that may exist.   |
| Support                       | Used to describe a situation where the practice educator provides input to the learner by the use of explanations, guidance and direction to facilitate learning   |

## **Learning Agreement**

Although the learning agreement is **primarily the responsibility of the learner to complete**, it should encourage discussions between a learner and their practice educator(s) as to how any individual areas of learning are addressed.

To get the most out of this section, we recommend completing it during the first week on placement with some preparation ahead of the first day if possible. This is not a 'one-off' – Learning on placement is a continuum from the first day to the last and even beyond. Revisit this section frequently adding to it as the placement progresses to help learners to get the most out from their time in practice.

There are 3 parts to the learning agreement;

- Factors that may impact on learning
- SWOC Analysis (Strengths, Weaknesses, Opportunities, Challenges)
- Personal Development Plan

Learners – Please refer to the <u>'Student Guidance Document'</u> for further information, top tips and examples. Please also refer to Appendix 3 for templates to capture reflective practice 'Learning from doing' and 'What? So what? Now what?'

*Practice Team – Please refer to the <u>'Practice Team Document'</u> for further information regarding how you can support learners to get the most out of this part.* 

### Factors that may impact on learning (optional)

This is a space for the learner to share any information that may affect their learning on placement in any way. To encourage dialogue between learner and practice educator(s) and to raise awareness so, if needed, appropriate supportive steps are put in place.

Factors could include (amongst others):

- Concerns about risk of discrimination linked to protected characteristics (age, disability, gender reassignment, race, religion or belief, sex, sexual orientation, marriage and civil partnership and pregnancy and maternity)
- Concerns regarding accessibility/access adjustments
- Social or family circumstances such as living environment, caring responsibilities or travel issues
- Health or wellbeing issues relating to physical and/or mental health
- Financial issues such as travel costs or access
- Religious or cultural beliefs, values or practises
- Previous problems encountered during placements
- Previous experiences such as bereavement, personal or family health or wellbeing issues that may be relevant to how the learner experiences the placement setting

Please refer to the student and practice team guidance document(s) for more information and examples.

#### <u>The CSP promotes anti-discriminatory practice and does not tolerate discrimination of any kind towards any</u> <u>individual</u>

Research and student lived experience tells us that some students experience unacceptable discrimination whilst on placement from both staff and patients. The CSP urge staff and students to report and challenge discriminatory behaviour to the workplace management and the university link tutor where matters should be addressed in line with local policy and procedures. Those experiencing discrimination are encouraged to access available support networks including; Placement Tutors, University pastoral support, NUS student officers, workplace support offered by your placement provider, Student Reps, CSP Diversity Networks, family and friends.

## **Learning Domains**

There are 10 learning domains;

| 1. Independent learning                              |
|--|
| 2. Seeking, reflecting on and responding to feedback |
| 3. Organisation and prioritisation                   |
| 4. Communication                                     |
| 5. Working with others                               |
| 6. Individuals, communities and populations          |
| 7. Gathering and analysing information               |
| 8. Evidence-based practice                           |
| 9. Reasoning and intervention                        |
| 10. Recording information                            |
|  |

## **Feedback from Others**

Throughout the course of the placement the learner will likely be working alongside others possibly including service users, members of the MDT and those in non-clinical roles. Feedback from such people is extremely valuable.

Although this part is not compulsory, we strongly encourage active use throughout the practice placement.

Please use the space below to provide feedback to the learner, this may be anonymous.

## **Final Assessment Summary**

To be completed by the Practice Educator following the End of Placement assessment.

## **Appendix 3. Reflective Practice Templates**

This section includes two templates to support you reflecting on your practice whilst on placement. Reflection may take different forms and there are no right or wrong ways to do it. You may choose to write them down using the templates attached, record them on your phone or speak them out loud. What is important is that you engage in reflective practice, asking yourself the questions highlighted amongst others. This adds layers to your learning, deepens your understanding and can support your achievement within the learning domains.

The CSP ePortfolio is an online digital portfolio of your work, reflections and achievement. It contains lots of different Continual Professional Development (CPD) templates and allows you to share content with others, including your practice educator(s). This tool is available to members of the CSP. Please <u>visit the CSP ePortfolio pages</u> of the web site to find out more.
